

Minesoft patent software solutions delivering excellence

Since 1996, Minesoft has been providing many of the world's leading IP law firms, patent attorney firms and corporate in-house IP departments with the tools that allow them to effectively search, evaluate and monitor patent information.

As technological developments proceed at an increasingly rapid rate, the need to keep a close watch on patent information becomes ever more urgent. Minesoft's innovative online services enable patent legal professionals to uncover and deliver accurate information to their clients cost-effectively and efficiently.

PatBase Express: the ideal firm-wide patent information solution

PatBase Express was developed by Minesoft and RWS Group in partnership to offer an intuitive interface for searching global patent information. This online, searchable patent database is used by patent attorneys and agents to carry out vital patent search and analysis for clients. Prior Art, Novelty or Infringement, and general technological

or company searches can all be conducted with minimal training to produce results with maximum impact.

Global coverage

Over 96 patent-issuing authorities are covered by the PatBase Express database, and the collection comprises over 20 full text collections including non-Latin full text from China, Japan and Korea. English machine translated text, cross-lingual search tools specially developed for patent searching (incorporating dictionary tools developed by third parties such as WIPO) and on-demand machine translation tools have all been incorporated to help overcome language barriers and to enable a more exhaustive search.
